

Language Proficiency Improvement for Life Skills and Employability

Raising international English language standards across the world

Ukraine | Advanced Humanitarian Solutions (UK)

Advanced Humanitarian Solutions, a non-governmental organisation is dedicated to helping Ukrainian refugees unlock their potential, rebuild their lives and make a positive contribution to the communities they live in.

Language skills are crucial for successfully integrating refugees into society. British Council's English Online programme helps facilitate this integration giving greater access to employment and education.

The challenge

Advanced Humanitarian Solutions needed a flexible, results-oriented English programme. One which enables learners to achieve their goals faster and more effectively. One which provides an immersive, supportive, holistic environment to develop skills and one which supports their diverse needs – from those living in remote areas to those needing to balance work and family life.

The Solution

Displaced Ukrainians in the UK have been able to quickly improve their English language abilities and prepare for work in the UK thanks to the British Council's English Online programme. The online learning platform provides the necessary flexibility to balance studying with work and family obligations, ensuring that each learner has the chance to succeed in their new life.

With continued collaboration between Advanced Humanitarian Solutions UK and the British Council, this innovative English language programme will favourably impact many more lives.
