Forewords

In the past twenty years, an increasing number of universities in non-Anglophone countries have opted to offer courses in English with a view to broadening their international appeal and attracting students and researchers from a different range of backgrounds to their campuses.

This is the first time that a survey of courses detailing modules or full courses in the medium of English in Brazil is published. The purpose of the British Council, in partnership with FAUBAI undertaking the survey, is to twofold: to act as a practical guide for UK students or universities who wish to study at or forge links with suitable institutions in Brazil; and to encourage further internationalisation of Brazil's tertiary education sector.

In an increasingly globalised world, the ability of the higher education sector to be able to operate at an international level is becoming increasingly critical to a country's economic success. Globally, more than 4.5 million students or researchers opt to study overseas¹. This flow of international students broadens mutual understanding, increases the world's reservoir of knowledge, and helps build lasting ties between countries.

Brazil's relative isolation has meant that it is less far ahead in this process than other major countries. But initiatives such as Science without Borders and the UK's Newton Fund have helped to shift the landscape. The UK too has been slow to capitalise on opportunities for undergraduates and graduates to study in Brazil, largely due to the small number of Portuguese speaking students. But the fact that we have been able to identify 695 courses taught in the medium of English indicates more and more Brazilian universities are keen to offer their expertise to a wider range of students, and we hope that this guide gives further impetus to the internationalisation process.

Martin Dowle
Director Brazil

British Council

¹ Source: "Education at a Glance 2014: How many students study abroad and where do they go?" - OECD

Student mobility is one of the main movers of the internationalisation process of higher education. The quality of destination institutions, their available infrastructure to receive international students, and the investment to be made by interested students, are factors that define whether the institution will or will not attract a great number of international students. The importance of courses and subjects offered in English, in case of Higher Education Institutions of countries whose communication language is not English, must also be highlighted.

In this scenario, Brazil's Higher Education Institutions have great advantages, as the country has many institutions of excellent quality, most of them ready to offer exchange opportunities to international students with no enrolment or tuition fees. The great challenge is still the obstacle with the teaching language. In order to overcome such difficulty, several Brazilian HEIs are directing their human and financial resources to the development of their English language courses and subjects, so that they may be considered as prestigious destinations in the universe of international education.

The release of the first 'Brazilian Higher Education Courses in English', a joint initiative of the British Council and the Brazilian Association for International Education - FAUBAI, comes as a catalyst of such efforts, providing information about the courses offered in English by the Brazilian HEIs. International students will be able to consult the possibilities of having excellent academic experiences in Brazil through a standard learning format. Moreover, with the arrival of international students, local students will benefit from the internationalisation process, which is being developed by the Brazilian HEIs at their own home country.

We rest assured that the information contained in this Guide will be able to stimulate more HEIs to develop courses and subjects in English, increasing the possibilities of attracting international students to Brazil, and contributing with the Brazilian Higher Education internationalization process.

José Celso Freire Junior
President

FAUBAI

Brazil and the Higher Education Institutions

About Brazil

Brazil is the largest country in South America and it shares borders with every country on the continent except for Ecuador and Chile. It is the fifth largest country in the world and it is similar in size to the continental United States. Divided into 26 states and one federal district, its geography varies significantly per region. The population is of around 199 million people. A disproportionate percentage of the population lives in the Southeast region, out of which 87 percent in urban areas. Brazil has a fast-growing economy. Key market systems include agriculture, mining, manufacturing, and the service sectors.

Brazil is Latin America's main market, representing almost 50% of the territory and 37% of the overall economy. Brazil's participation in the region's economy is expected to maintain its pace or to reduce its share by 1-2%, mainly due to Mexican and Colombian rise for the period. Even with the Nominal GDP participation volume reduction in the continent, Brazil will continue to have a strong status regarding the inflow of foreign capital and market significance inside the region².

Higher Education in Brazil

According to Brazilian legislation, school education encompasses two levels: basic education, comprising of early childhood education, primary education and secondary education, and higher education.

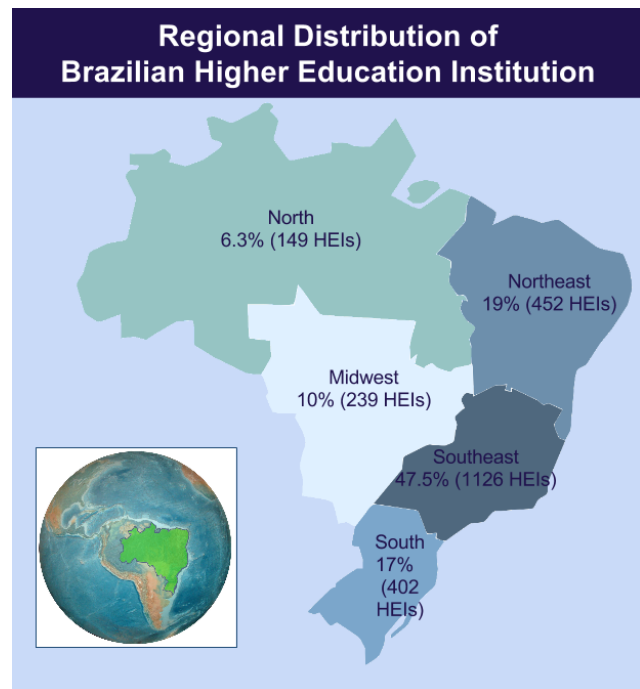

Higher education in Brazil is divided into undergraduate and graduate levels. The standard Brazilian undergraduate bachelor's degree is awarded in most fields of arts, humanities, and sciences and it normally requires 4 years of post-secondary studies at a certified university. Aspiring teachers may take a licentiate degree, which takes three to four years to be completed, while technology courses offer highly specialized professional degrees and take between two to three years. Five-

year degrees are awarded in the so-called professional careers such as architecture, engineering, veterinary medicine, dentistry, and law. The undergraduate degree in medicine requires six years of full-time post-secondary studies, plus several years to specialize in a given field.

For those wishing to be enrolled in full programmes in Brazil, students must pass a competitive entrance examination (known as Vestibular) for their specific course. The number of candidates per available openings in the freshman class is likely to be high in the most competitive courses at the top public universities. Brazil's school year starts in February / March, with a break in July and continues until December. Summer vacation goes from mid-December to early February.

Today, Brazil has one of the most impressive graduate educational levels among developing countries. Graduate master's degrees are awarded following the completion of a two-year programme, plus the submission of a Master's dissertation. Doctoral degrees require four years of full-time studies and the submission of an extensive doctoral thesis.

The Brazilian university system reflects world standards and some of Brazil's universities appear among the 200 best in the world³. With Brazil's push towards

³ <http://www.topuniversities.com/university-rankings>

improving educational standards and its recent moves towards attracting international students, it is becoming easier for international students to apply to study in Brazil.

Internationalisation and Brazilians HEIs

Internationalisation of higher education is a subject that is gaining increasing relevance both for public and private Brazilian HEIs. Internationalisation has been used as an instrument that makes a difference in the outlook for teaching, as well as for research.

To encourage the internationalisation of Brazilian HEIs, many initiatives are aimed at raising the intensity of student and/or faculty mobility in Brazil. Brazilian federal research agencies have a long-track record of supporting international research partnerships. Bilateral agreements with various countries in Europe, North America as well as Latin America have existed for decades.

To develop the “British Council – FAUBAI Guide of Brazilian Higher Education Courses in English”, a survey of all courses and activities offered in English Language at Brazilian HEI’s has been carried out. A questionnaire was prepared and sent by e-mail to international offices or institutional sections related to international activities from public and private HEI’s, according to a specially organized database.

Guide of Brazilian Higher Education Courses in English

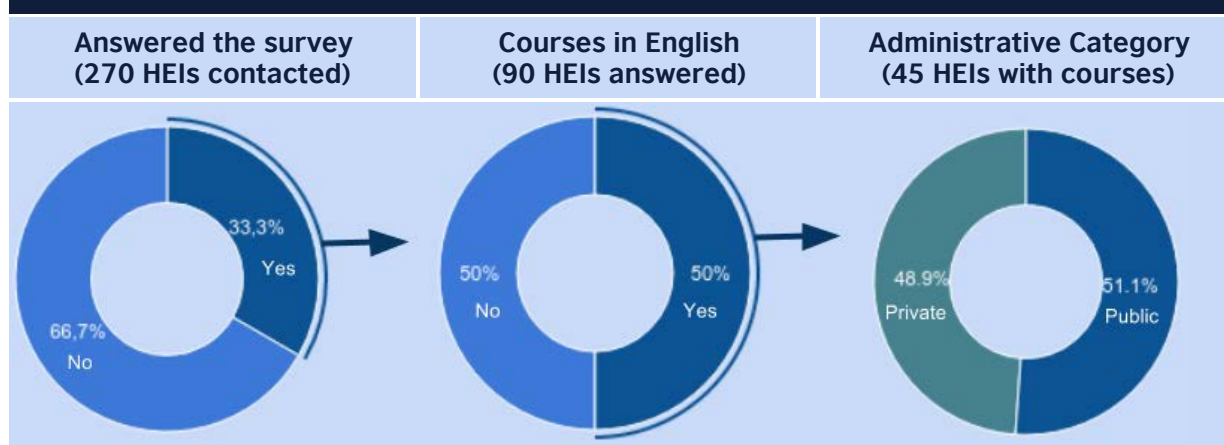

This guide presents the results of a survey answered by Higher Education Institutions (HEIs) from Brazil that offer courses in English for international students. During the first phase of the research, the questionnaire was sent by e-mail to international offices of 270 HEI's, which comprises about 12% of all HEI's in Brazil⁴. The database was built by combining the individual databases of FAUBAI (Brazilian Association for International Education), ABRUEM (Brazilian Association of Rectors of State and Municipal Universities); ANDIFES (National Association of Directors of Federal Institutions of Higher Education); ABIPE, (Brazilian Association of Professional and Student Exchange); and CRUB (Council of Rectors of Brazilian Universities). Thus, this guide covers the country's most important public and private HEI's.

In Phase I, HEIs were asked basic information about the institutions (e.g. number of domestic and international students, number of graduate and undergraduate programmes, international students support, contact details, etc.) and whether or not they offered programmes/courses in English. In this Phase, 33% of HEI's responded to the survey. In a second phase, HEIs that stated offering courses in English were contacted by e-mail and telephone and asked to provide more detailed information about their programmes.

The guide was then developed based on 45 Brazilian HEIs, from four different Brazilian regions, and present detailed information on 671 courses offered in English.

⁴ The total number of Higher Education Institutions in Brazil in 2014 was 2,368 according to the last research made by the National Institute of Education Studies and Researches Anísio Teixeira (INEP), a federal authority linked to the Brazilian Ministry of Education.

Survey Answers

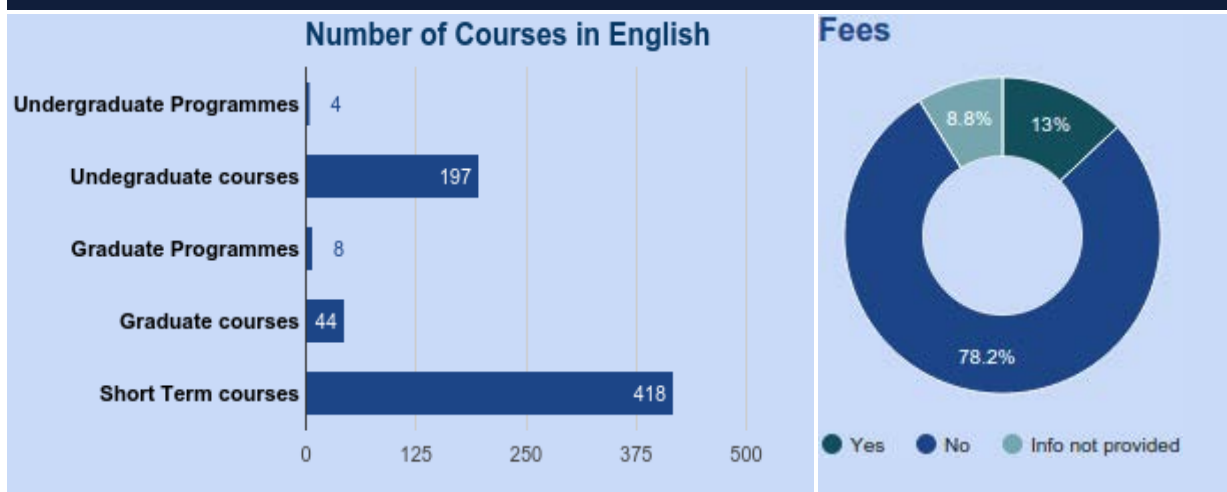

Administrative Category / HEIs (details)

Private: charitable	Private: profit-making	Private: non-profit non- charitable	Public: State	Public: Federal	Public: Municipal
2.2%	4.4%	42.2%	20.0%	28.9%	2.2%

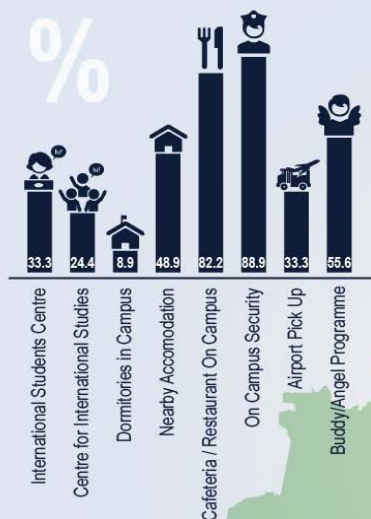

In this guide, international students and academics will have access to detailed information of courses offered in English language at Brazilian HEIs, including academic programmes, short-term courses, Portuguese as a Foreign Language, Doing Business in Brazil, Brazilian Culture to foreign students.

Fundação Edson Queiroz Universidade de Fortaleza

**FUNDAÇÃO EDSON QUEIROZ
UNIVERSIDADE DE FORTALEZA**
ENSINANDO E APRENDENDO

State: Ceará

Administrative Category: Private: non-profit

Academic Organisation: University

Located in Brazil's Northeast, in the capital city of Fortaleza, the University of Fortaleza has been offering, since 1973, the best conditions for teaching and learning. With qualified professors, a modern infrastructure and incentives for research and graduate studies, all packed into an institution that maintains an excellent exchange programme. Students from Unifor and abroad are united in courses given in the English language as well as in many different activities offered in campus.

Universidade Federal do Rio Grande do Norte

State: Rio Grande do Norte

Administrative Category: Public, Federal

Academic Organisation: University

Created on June 25th, 1958, UFRN stands out among the top public universities in Brazil, providing programmes in all areas. Currently, they have almost 40,000 students, distributed in more than 250 undergraduate, master's and doctorate programs. Research is developed in all areas with strong international cooperation, especially regarding Materials Engineering, Oil, Biodiversity and Tropical Medicine, and by the Brain Institute and the International Institute of Physics.

Universidade de Pernambuco

State: Pernambuco

Administrative Category: Public, State

Academic Organisation: University

UPE is a public institution of higher education, present in all regions of the State. Its multi campuses complex consists of 15 school units spread across the metropolitan area of Recife and the cities of Nazaré da Mata, Palmares, Caruaru, Garanhuns, Arcoverde, Salgueiro, Serra Talhada, and Petrolina.

The university aims to be recognized by government and by society for its contribution to the sustainable development of all the regions in which it is present, due to its excellence in teaching, research and university extension, thereby assuming the definitive characteristics of state, public and tax-free university.

Universidade Federal de Pernambuco

UNIVERSIDADE
FEDERAL
DE PERNAMBUCO

State: Pernambuco

Administrative Category: Public, Federal

Academic Organisation: University

Federal University of Pernambuco is the 28th best Brazilian university in reference to teaching, and the best in the northern region of Brazil, according to evaluations from the Ministries of Education (MEC) and Science and Technology (MCT). It is the 8th institution with the most research groups in the country, according to the last census conducted by the National Council of Scientific and Technological Development (CNPq, part of the MCT), with 523 groups.

Recently, with the support of the federal government, UFPE has expanded its scope of practice and has improved its interaction with society, increasing the number of students in the already existing courses and creating new ones in response to social and economic demands, focusing on the new economic scenario of the state of Pernambuco.

Their mission is to promote the education of people and the formation of scientific, technical knowledge, and abilities of international standards, according to ethical, environmental and cultural principles.

Grupo SER Educacional

State: Pernambuco

Administrative Category: Private, profit-making

Academic Organisation: University

The embryo of the Ser Educacional Group emerged in 1994, with the creation of *Bureau Jurídico*, to prepare candidates for competitive public exams. Since 2003, the group has grown in a gradual and sustainable manner. Ser Educacional operates respected institutions, aligned with its vision, mission and values, as well as with its identity and actions. Above all, the group and its institutions are commitment to human beings and their personal and professional fulfilment. Ser Educacional's commitment to employability and entrepreneurship is the result of the Company's awareness of its role in shaping individuals, with focus on personal growth.

UniEVANGÉLICA

State: Goiás

Administrative Category: Private, non-profit

Academic Organisation: University Centre

UniEVANGÉLICA is the largest and oldest educational institution kept by AEE, and houses the first three undergraduate courses in the countryside of the state of Goiás, which are Pedagogy (founded in 1961), Law (founded in 1969), and Dentistry (founded in 1971). It is considered a regional reference, both for its educational quality and its strategic geographic location, attracting many students from all regions of the country.

Universidade Estadual Paulista “Júlio de Mesquita Filho”

State: São Paulo

Administrative Category: Public, State

Academic Organisation: University

UNESP is the most successful model of a multi campus university in Brazil. Such unique characteristic allows intense and diversified activities in São Paulo, the most developed State in the country. Its influence is recognized by the level of regional development where its campuses are located: one in the State capital and other 23 strategically distributed within the State.

Universidade Federal do ABC

State: São Paulo

Administrative Category: Public, Federal

Academic Organisation: University

UFABC is one of the youngest Brazilian universities. Founded in 2006, today it operates two campuses, both still partly under construction, but with an already established reputation for high-level interdisciplinary research and teaching. Interdisciplinarity is a key concept at UFABC, which is being discussed since the second half of the last century, as need for knowledge integrity compensation led to this approach, which consists of combining efforts from a variety of subjects aiming problem solving.

Universidade Metodista de São Paulo

State: São Paulo

Administrative Category: Private, non profit, non-charitable

Academic Organisation: University

As an educational institution, Universidade Metodista de São Paulo has, as its main objective, the dissemination of knowledge and a student body properly qualified for the job market. For Metodista, more than high-quality professionals, it is necessary to educate citizens. Having individuals with technical capabilities is as important as their capacity to be agents of change who make a difference in society.

Universidade de Ribeirão Preto

State: São Paulo

Administrative Category: Private, non-profit

Academic Organisation: University

UNAERP is an Institution of higher education founded in 1924 in the state of São Paulo. To prepare professionals to address the challenges the world faces today, UNAERP has invested in teaching, research, and in a network of services to the community. Established in two campuses, Ribeirão Preto and Guarujá, UNAERP offers undergraduate and graduate programmes in the areas of Humanities, Health, Exact Sciences, and Technological Courses. QS rated UNAERP as one of the greatest educational centres of Latin America with an increasing number of international partners.

Universidade Federal de Viçosa

UNIVERSIDADE
FEDERAL DE VIÇOSA

State: Minas Gerais

Administrative Category: Public, Federal

Academic Organisation: University

Viçosa Federal University (UFV) is a public, non-profit higher education institution with around 20,000 students and over 1,200 professors. Founded in 1926, UFV is considered as the main Brazilian university in agriculture, with several graduate programs ranked at international level (Plant Pathology, Entomology, Genetics and Breeding, Animal Science, Plant Science, Plant Physiology, Agricultural Microbiology, Soil Science, Agricultural Engineering, Forest Science, Veterinary Medicine). Nowadays, the UFV has become an ample university, with the inclusion of programmes of Engineering, STEM, Humanities and Health.

Universidade Estadual de Campinas

State: São Paulo

Administrative Category: Public: State

Academic Organisation: University

The University of Campinas is a public university funded by the State of São Paulo. It was established in 1966 in the city of Campinas, with the goal to become an academic centre of excellence, producing excellent basic and applied research, providing high-standard undergraduate and graduate education and serving as a catalyst for economic and social development. Unicamp provides undergraduate and graduate education for all its students, free of charge. In addition, there are many graduate scholarship programmes to help support students pursuing graduate degree programmes. Overall, Unicamp is an internationally recognized centre of academic excellence, with a very distinct profile among Brazilian higher education institutions as a leader in technology, health sciences, natural sciences, human sciences and arts.

Universidade Federal de Itajubá

State: Minas Gerais

Administrative Category: Public, Federal

Academic Organisation: University

UNIFEI is a technological and entrepreneurial university with a centenary tradition in teaching Sciences, Engineering and Technology. It was the tenth founded university in Brazil, and in 2002, it was placed among the top ten Brazilian Universities by two different rankings. UNIFEI has two campuses: one in Itajubá, south of Minas Gerais, located 270 km from São Paulo and 320 km from Rio de Janeiro; and another campus in Itabira, 544 km away from Itajubá and 105 km from Minas Gerais' state capital, Belo Horizonte. Currently, there are 6,920 students enrolled in 35 undergraduate courses, plus 2,000 students in 28 graduate courses. UNIFEI has been working on offering as many classes in English as possible.

Universidade Federal Fluminense

State: Rio de Janeiro

Administrative Category: Public, Federal

Academic Organisation: University

Located in Niterói, UFF and its various campuses merge with the city's geography, and is distributed in various districts - Central, Santo Domingo, Inga, Santa Rosa, Vital Brazil - and it was incorporated into the routine of the residents. The university is for the city as the town is for the Bay of Guanabara: UFF integrates the urban landscape.

Pontifícia Universidade Católica do Rio de Janeiro

State: Rio de Janeiro

Administrative Category: Public, non-profit

Academic Organisation: University

The Pontifical Catholic University of Rio de Janeiro was founded in 1940 with the objective of becoming a higher education institution of excellence based on humanistic values. PUC-Rio is a doctoral research institution that focuses primarily in the development of academic and scientific knowledge, in order to have successful undergraduate and graduate professionals.

Through the International Cooperation Central Coordination Office, PUC-Rio has academic collaboration for student exchange with various international higher education institutions, agreements involving teaching and staff exchange and other partnerships for research and joint projects.

Centro Universitário Belas Artes de São Paulo

State: São Paulo

Administrative Category: Private, non-profit

Academic Organisation: University Centre

Belas Artes believes that the exchange of information and experience with other countries is vital for personal growth and for professional career development, reason why Belas Artes opened its doors to host students from all the corners of the world.

The courses offered to international students have the same educational and quality standards as the other courses offered at Belas Artes. With their modern and high-tech infrastructure and experienced teaching staff – who, in addition to lecturing, are also active professionals in their own field - present students with the latest trends and novelties. The students have the opportunity to learn more on recent trends and concepts, improving their repertoire for the production of innovative and bold projects.

Escola de Administração de Empresas de São Paulo da Fundação Getúlio Vargas

State: São Paulo

Administrative Category: Private, non-profit

Academic Organisation: College

Founded in 1954, EAESP has trained generations of business and public management leaders. Each year, EAESP consists of more than 3,000 students, 260 professors, over 100 employees, and thousands of alumni.

EAESP is a school that integrates business practice and is at the frontier of research, in Brazil and worldwide. The connection with practice is part of their DNA and is evident in the 16 research centres, departments and forums. Their leading position in research is demonstrated by the recognized quality of their doctoral programmes and their national and international collaborations.

Centro Universitário La Salle

State: Rio Grande do Sul

Administrative Category: Private, Charitable

Academic Organisation: University Centre

Tradition and growth define Centro Universitário La Salle, a higher education institution that has been directly connected to the history of Canoas since La Salle's work began in the city over 100 years ago. With more than 8,000 students enrolled in undergraduate, lato sensu graduate programmes (specializations and MBAs), stricto sensu graduate programs (Master's), and extension programs in a wide knowledge fields variety, Unilasalle Canoas grows year over year by creating new projects to meet society's needs. In keeping with the program expansion process, the Institution has been investing in research and extension to broaden and imprint the school's academic and social commitment onto the community.
