

Answers to Clarification Questions

Request for Proposal (RFP)

Social Enterprise Landscape Surveys in Singapore and Hong Kong

Wednesday 18th December

Question 1

We noted that the expected number of responses for the survey is 500. Can we check whether you are looking beyond your local research partner in soliciting social enterprise names since currently your local research partner has around or less than 500 members?

The social enterprise survey should target all social enterprises in the geography to be surveyed and not be limited to one network or community.

We appreciate that 500 survey responses is an ambitious target and whilst this is an aspiration, we will be aiming at a minimum of 300 responses to the survey in Singapore

Question 2

Can we provide incentives for survey completion as part of the budget to entice social enterprises to answer the survey?

It is up to potential suppliers to suggest how best to approach the project costings in their proposals.
