

INTRODUCING LANGUAGE ASSESSMENT

Worksheets

**TEST
DEVELOPMENT**

TEST DEVELOPMENT

[Test Development: 6' 29'']

The process of test development includes different steps and different phases. Quality is important both for major tests and for classroom tests. In order to contribute to learning, any test needs to provide teachers and learners with reliable and useful information. This video will help you understand what quality means in test development and the importance of test specifications.

A. BEFORE YOU WATCH

Note: These three questions are meant to help you prepare for the video and relate it to your context. There are no “correct” answers.

1. **What international tests do you know? Have you ever heard about IELTS or TOEFL?**
2. **Do you use published practice materials from international tests in your classroom?**
3. **Do you develop your own tests? Do you find it easy or difficult? Why?**

B. WHILE YOU WATCH

Quality and test development

4. Quality is important to achieve and test results.

5. Which two decisions need to be made before starting to develop a test?

1.

2.

6. Match the Test Development Phase with the definitions in the description column in the table, which are NOT in order (e.g. 1 - D)

Phase	Description
1. Planning	A. Trial of the materials developed, collection of feedback, introduction of changes.
2. Design	B. Live test performance analysed. Revision of materials and update.
3. Development	C. Construction and administration of a complete test.
4. Operational	D. Identify potential candidates
5. Monitoring	E. Writing specifications, deciding on test features and topics, production of sample materials

7. The video compares the development of *classroom tests* to the development of major *international tests*. State which aspects are the same or different in the two different assessment contexts.

The importance of Test Specifications

8a. What should you include in your Class Profile?

8b. The video mentions a number of characteristics to include in Test Specifications. Which would you include in the Specifications for a test in your context?

Characteristics	YES / NO
Purpose of the test	
Skills and language elements to test	
Time constraints	
Sections (how many, length)	
Methods in each section (Multiple choice/T-F...)	
How many items? All count equal?	

8c. What is the main purpose of test specifications?

Operational issues

9. Write down the issues to monitor in relation to test administration and test analysis.

A. Administration

.....

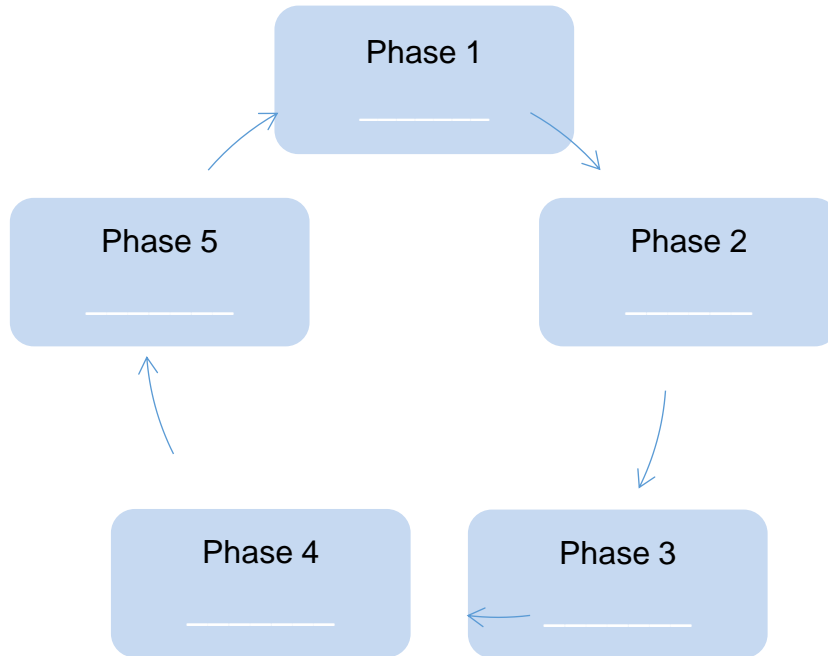

B. Post test Analysis

.....

10. Why is review and monitoring important?

C. AFTER YOU WATCH

11. **Summary:** This diagram illustrates the Test Cycle Phases described in the video and in Activity 6 in this worksheet. Write the corresponding labels for each Phase.

12. **Action planning:** Think about one of your classes. Which ideas from this video would you like to try next time you prepare a test for that class?
